## Feed the Future:

- ✓ Born out of the high food price crisis beginning in 2007, and inspired by the “Green Revolution
- ✓ Built on IEHA and the GFSR
- ✓ Adopted FFP framework for Food Security (Availability, Access, Utilization)
- ✓ Announced in 2009 at G-8 Summit in L’Aquila, Italy
- ✓ Part of G20+ global effort
- ✓ Whole of Government

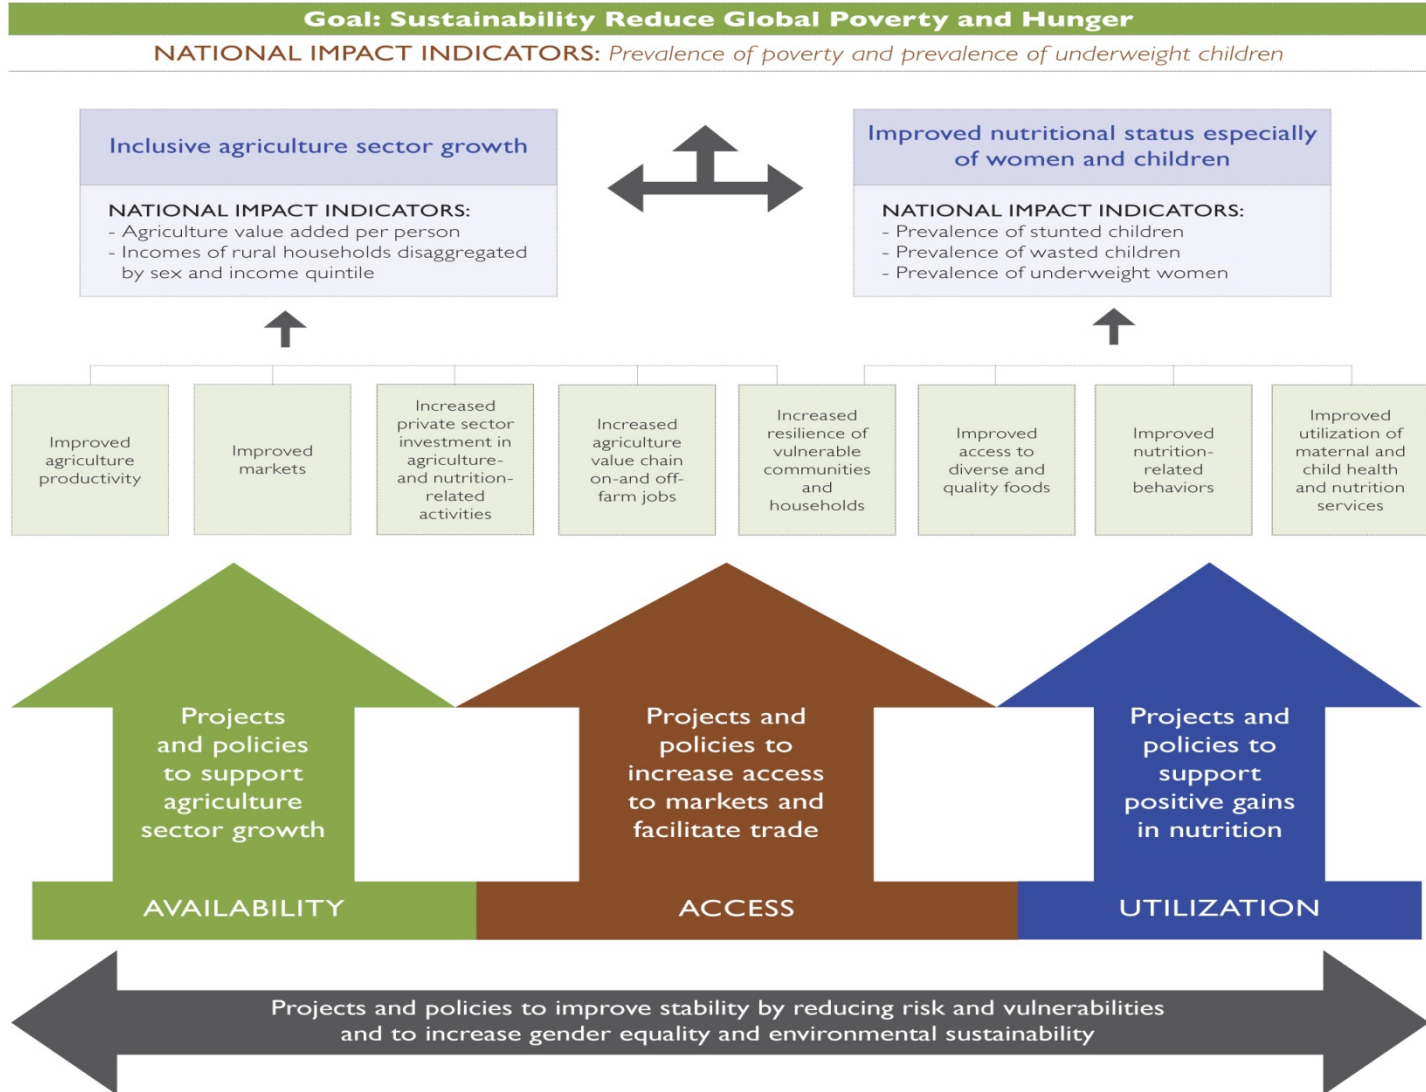

# FEED THE FUTURE

The U.S. Government's Global Hunger and Food Security Initiative

FIGURE 1 – FEED THE FUTURE RESULTS FRAMEWORK

**Focused choices:** Use evidence to focus USG resources where there is transformational potential.

**Targeted resources:** Within a country, in coordination with government and other donors, concentrate resources in defined geographic areas of transformational potential.

**Market demand** is critical to sustainable change in the agricultural sector. The private sector must be engaged.

**Scalability:** Examine cost benefit in terms of **scalable change**.

**Accountability:** Define how budget dollars translate into real results.

**Address cross-cutting goals:** Nutrition, greater opportunities for women, and combatting climate change----require a multi-sector approach to programming.

"I think you should be more explicit here in step two."

## FTF Learning Agenda

- **Identify and examine synergies among direct nutrition interventions and agricultural programs.**
- **Clearly articulate nutrition goals and interventions if agriculture, horticulture, and food security programs are expected to improve nutrition.**

## Key Questions:

- What have been the impacts of different approaches linking Agriculture, Nutrition and Health (ANH) on dietary diversity and nutritional status (i.e. geographic co-location of programs, integration of interventions, and which combinations)
- Have programs to increase farmers' incomes resulted in improved nutrition when not coupled with nutrition programming?
- What activities have enabled value chain investments to lead to improved consumption of diverse diets?
- Which agriculture technology interventions have improved diets and nutrition outcomes?
- What investments in human and institutional capacity development have effectively generated large scale nutrition outcomes?

**FEED**<sup>THE</sup>**FUTURE**
