FEED^{THE}**FUTURE**

The U.S. Government's Global Hunger and Food Security Initiative

Nutrition Policy Priorities to Advance FTF Nutrition Outcomes

Jim Oehmke and David Atwood, BFS/ARP/Policy Team

Takeaway

FTF needs your help specifying host government, regional, and global policy priorities and actions that will accelerate or expand the nutritional impacts of project/program interventions of USAID and others

What Is “Policy”

- Is higher than projects and programs
- Consists of laws, treaties, regulations, statements, administrative actions and funding priorities.
- Comprises part of FTF approaches, now focused on seven global policy priorities including nutrition policy

Core Components of a Policy System

Institutional Architecture

Focused on the stability, transparency, inclusivity and efficacy of the host country process for policy formulation, implementation and enforcement

Policy Agenda

Focused on the set of laws, regulations and administrative actions that add the greatest value to CIP investments and accelerate the achievement of growth and poverty reduction targets

Mutual Accountability

Focused on creating an environment where donors, governments, and involved stakeholders are all accountable to each other for development results

Directing policy towards impact at scale

FEED ^{THE} FUTURE

The U.S. Government's Global Hunger and Food Security Initiative

Nutrition Policy Development Objective

Host country, regional and global food security **policy** changes required **to accelerate nutritional impact** generated from project and program investments

Discussion

Policy Priority Action	Enables what nutritional investment/action?	Generates what nutritional intermediate outcome
What are the top three policy priority actions supporting better nutrition? Priority Action #1	What action will taken / taken more effectively than without the policy? Is it a nutrition priority action? Is policy the best way to enable this action?	E.g. dietary diversity
Priority Action #2		
Priority Action #3
