Nutrition Global Learning and Evidence Exchange

Phnom Penh, Cambodia | December 13, 2014
Nut-GLEE Objectives

- Provide technical updates on topics related to nutrition, sharing effective multi-sectoral strategies that support reductions in undernutrition and in maternal, infant, and child mortality.

- Guide mission staff through USAID’s Multi-Sectoral Nutrition Strategy (2014-2025) and approaches for its implementation, especially through integration of nutrition into health programming.

- Share case examples from USAID programs on integrating and amplifying results for nutrition.
WHA Global Targets for 2025
May 2012

- Achieve a 40% reduction in the number of children under-5 who are stunted
- Achieve a 50% reduction of anemia in women of reproductive age
- Achieve a 30% reduction in low birth weight
- Ensure that there is no increase in childhood overweight
- Increase the rate of exclusive breastfeeding in the first 6 months up to at least 50%
- Reduce and maintain childhood wasting to less than 5%

Global Nutrition Report
November 2014
Messages

1. Nutrition is a foundation for the SDGs
2. Malnutrition is a concern for all countries
3. Multiple burdens are a “new normal”
4. Progress is slow globally but there are some spectacular country advances
5. We need more ambition on targets
6. Scaling up is more possible than ever
7. Nutrition accountability needs strengthening
The world is off course

- Stunting
- Wasting
- Overweight
- Anemia
- Low birth weight
- Low exclusive breastfeeding
Recommended Actions

1. Embed nutrition more strongly in SDGs
2. Develop more ambitious 2030 targets
3. Embrace complexity of multiple burdens
4. Relentless focus on coverage of nutrition-specific interventions
5. Find resources outside the health sector for nutrition-sensitive interventions
6. Invest in a nutrition data revolution
7. Be accountability champions

We need to speak to other sectors about nutrition – in their language...
...because big chunks of government budgets go to nutrition-relevant sectors.
