Building the Evidence

Engaging Men and Boys in Food and Nutrition Security: The Hidden Half of Gender Equality Programming

Part Three of a Gender Webinar Series Co-Presented by SPRING, TOPS, & USAID

SPRING, TOPS, and USAID invite you to participate in the final segment of the three-part webinar series, **Women's Empowerment and Men's Engagement: How a Focus on Gender Can Support Agriculture and Nutrition.**

Gender inequality is recognized as a common underlying constraint to food and nutrition security in developing countries. This is seen through gendered divisions and societal expectations in relation to economic activities, household decision-making, and caregiving. These divisions—which can be reinforced through traditional development programming—risk limiting impact by failing to bridge the disconnect between who has economic authority and opportunities and who is responsible for nutrition and care within households. For stronger development impact on food/nutrition security and “transformative” gender change, there is increasing recognition of the importance of engaging both men and women for gender equality.

Planning for Success

SPRING Engagement with BFS

Technical assistance to Missions and Implementing Partners

- Process monitoring
- Context assessment
- Nutrition-sensitive behaviors along the pathways

Field work to build evidence base and share better practices

- Nutrition messaging
- Integrating agriculture, health, nutrition

Who we are

- A 5-year, USAID centrally-funded Cooperative Agreement (Oct 1, 2011 – Sept 30, 2016)
- Strengthens global & country efforts to **scale up** high impact nutrition practices
- Focuses on the first 1,000 days to prevent stunting and anemia
- Partners – JSI, Save the Children, Helen Keller International, Manoff Group and IFPRI
