EXERTING INFLUENCE: HIGHLIGHTS

March 2016

U.S. Ambassador to Ghana tours the community-based health planning and services compound in Kasuliyili of the Tolon District in the Northern Region

May 2016

Attended the Micronutrient Task Team in Accra to share SPRING’s anemia programs and tools

August 2016

Presented the “WASH 1,000” approach at the Water Engineering and Development Centre Conference in Kumasi

SPRING WORKS ACROSS SECTORS TO STRENGTHEN NUTRITION

Through Farmer Field Schools, trained 15,178 people—including 11,123 women selected from 1,000 day households in 150 communities—on good pre-harvest and post-harvest groundnut cultivation practices

Community Led Total Sanitation (CLTS) villages constructed over 2,685 household latrines and 3,698 tippy tap handwashing stations within and around households to improve hygiene

Supported 2,457 mothers from 145 mother-to-mother support groups in developing action plans to improve infant and young child feeding and hygiene

Introduced a quality improvement cycle for infant and young child nutrition at 95 health facilities in 7 districts and trained over 563 health staff and 65 district managers as quality improvement coaches

REACHING PEOPLE (Life of Project)

Through our 1,000 Day Household agenda in Ghana, we are working with community members, health workers, and students to reduce stunting in the north of the country.

1,124,068 people contacted

38,056 people trained

21 institutions supported

596,851 children under 5 contacted
