SPRING IS WORKING TO STRENGTHEN THE NUTRITION SYSTEM IN BANGLADESH

Conducted 7,568 sessions across 1,280 Farmer Nutrition Schools (FNS), reaching 25,010 women with household agriculture, hygiene, nutrition, and infant and young child feeding (IYCF) training.

Conducted 99,877 household visits to FNS graduates to reinforce the desired essential nutrition actions (ENA) and essential hygiene actions (EHA) that FNS sessions promote.

Launched a study report that found that the presence of tippy taps in and around the household, as well as the promotion of hand-washing, has a significant positive impact on handwashing practices.

Conducted 4,047 supportive supervision and monitoring visits to health and family planning facilities, agriculture extension agents, and government community groups/community support groups.

REACHING PEOPLE

1,663,228 people reached
8 institutions supported*
868 agricultural extension workers and 1,379 health facilities supported*

* through the first half of FY 2016 only

SPRING is reaching women and children under two in Bangladesh through the training of health workers and agriculture extension officers, and through farmer nutrition schools.

EXERTING INFLUENCE: HIGHLIGHTS

Presented SPRING’s work with tippy taps in Bangladesh at the SBCC Summit in Addis Ababa, Ethiopia.

Participated in the second annual Safallo Gatha meeting as part of the government’s effort to catalogue and recognize best practices in health, population, and nutrition.
