In Senegal, SPRING is improving nutrition among pregnant and lactating women and children under two with a coordinated training, communication, and support strategy. Through a multisectoral network of partners in the Kaolack, Fatick, and Kaffrine regions, SPRING equips beneficiaries with improved nutrition knowledge and high-impact behaviors to reduce malnutrition.

**HEALTH CENTER**
Train community health networks in essential nutrition actions, essential hygiene actions, and gender

**COMMUNITY MOBILIZATION**
Organize community events to promote services and behaviors linked to nutrition, water, sanitation and hygiene (WASH), nutrition-sensitive agriculture, and gender, such as promoting gender equitable task sharing, or handwashing with tippy-taps in households, family gardens, schools and health huts

**DIETARY DIVERSITY THROUGH AGRICULTURE**
- Establish demonstration plots to introduce new crops like biofortified maize and orange fleshed sweet potato, improved poultry rearing and demonstrate good practices for cultivation of nutrient rich fruits and vegetables, storage/preservation, and consumption
- Install cereal transformation units and train women’s cooperatives to produce cereal mixes using various biofortified crops

**COMMUNITY VIDEO**
Train partners to produce and disseminate community videos on infant and young child feeding, dietary diversity, handwashing, improved cereal production, poultry rearing, food storage and preservation, and other topics

This graphic is made possible by the generous support of the American people through the United States Agency for International Development (USAID) and Feed the Future, the U.S. Government’s global hunger and food security initiative, under the terms of the Cooperative Agreement AID-OAA-A-11-00031 (SPRING), managed by JSI Research & Training Institute, Inc. (JSI) with partners Helen Keller International, the Manoff Group, Save the Children, and the International Food Policy Research Institute. The contents are the responsibility of JSI, and do not necessarily reflect the views of USAID or the United States Government.

USAID’s multi-sectoral nutrition project
SPRING WORKS ACROSS SECTORS TO STRENGTHEN NUTRITION

Trained farmer partner networks, seafood processors, community health workers, community-based organizations and women’s groups on a range of topics, including 1,161 participants on nutrition-sensitive agricultural practices, 271 on improved nutrition practices (i.e. IYCN and dietary diversity), 133 on gender equity, and 1,139 on WASH.

Broadcast 15,120 radio spots and 144 interactive radio programs on IYCF, hygiene, gender, dietary diversity and agriculture to improve nutrition

Established 1492 demonstration sites including: 36 fields growing an improved maize variety, 52 plots for orange-fleshed sweet potato, and 44 with bio-fortified millet, 199 on tippy-tap installation and use, 12 on poultry raising, and 1,149 micro gardens

24,489 contacts established with community videos across 104 villages

PROGRAM PARTNERS

GOVERNMENT OF SENEGAL
- Office of the Prime Minister, Unit for Combating Malnutrition
- Ministry of Agriculture
- Ministry of Health and Social Action

PRODUCER NETWORKS
- FEPROMAS
- ADAK
- SYMBOISE
- APROFES
- UCPCL
- YAKHANAL

USAID PROJECTS
- Yaajeende
- Naatal Mbay

NON-GOVERNMENTAL ORGANIZATIONS
- Caritas
- ChildFund
- World Vision
- Plan International
