

How to Prevent and Treat All Diarrhea in Children

SUBTITLES

00:01-00:08 – HOW TO PREVENT AND TREAT ALL DIARRHEA IN CHILDREN

00:12-00:16 - Today we are at the village of Tsanwa in Guidan Roundji, Maradi region.

00:18-00:26- In this video, we will learn the importance of preventing human and animal defecation where children play.

00:27-00:33 - Feces contain diseases that cause diarrhea.

00:52-00:54 - Peace be with you! Peace be with you too!

00:56-01:01 - Good morning. Morning! Larai you are sitting alone. I hope everything is fine, your child does not look happy.

01:02-01:06 - I am fine but my child is sick. Have a seat!

01:13-01:22- I asked you about your child earlier, you told me he is suffering from diarrhea as a result of teething. But that kind of diarrhea can also dehydrate the baby.

01:23-01:29 - Lack of hygiene cause a child to have diarrhea.

01:30-01:35- You have chickens and other domestic animals roaming in the compound which can cause digestive problems.

01:36-01:41 - Your pounding tools are kept uncovered which can cause digestive problems too.

01:42-01:45 - Look at his body, he is completely dehydrated.

01:47-01:51 - How can a child's development be delayed by diarrhea?

01:55-02:02 - Each time a child has had diarrhea, he/she loses nutrients which are necessary for growth and development.

02:04-02:07- Larai, how many times did your child have loose stools today? Four times a day.

02:08-02:12 - Have you taken him to the health center? No, I didn't because the diarrhea is due to teething.

02:13-02: 18 - Even if the diarrhea was caused by teething, you should prepare ORS for him at home before and then take him to the health center.

02:19-02: 23 - Larai do you know what ORS is? Yes, I know ORS.

02:24-02:27 - Have you prepared the ORS for him? No, I didn't because the diarrhea is due to teething.

02:28-02: 32 - Do you have potable water? Yes, I have. I have just finished preparing porridge, therefore, I still have some boiled water left.

02:33-02: 35 - Okay. Bring some utensils lets prepare ORS for him.

02:40-02: 48 - If you have a baby/child between 6 to 24 months, what type of medicine should you always have at home?

02:51-02: 54 - Oral Rehydration Salt - ORS

02:57-03:00 – Larai, since you have brought the utensils, bring soap so that we can wash our hands.

03:01-03:05 - There is no soap. Do you have ashes? Okay. Bring some for us to wash our hands. Alright!

04:37-04:41 - This is an ORS packet. It contains whatever a child loses during diarrhea.

04:42-04:48 - This is a can that takes one liter of water. We have our boiled water and a clean spoon.

04:49-04:54 - We now open the can, and pour water, in which we will pour the OSR packet.

05:13-05:15 - I will pour the ORS now.

05:28-05:33 - I will then stir the ORS which is a treatment for diarrhea.

05:52-05:56 - This is the ORS solution. Give it to him all day long.

05:57-06:03 - Take some with you when you take him to the health center. Prepare a new ORS solution the following morning.

06:05-06:08 - Continue giving it until the diarrhea stops. Okay, no problem.

06:10-06:13 - You now give him the ORS solution. Okay.

06:21-06:28 – Drink up. Drink or else you will not get your treat. Drink.

06:37-06:43 – Larai, continue giving your child sufficient water and more food than usual. Alright.

06:44-06:46 - Breastfeed him also more than you are used to do. Okay.

06:48-06:51 - Don't you think if I give more food and water, the diarrhea will worsen?

06:52-06:55- No, the diarrhea will not worsen. It will only replace liquids and nutrients he has lost. Okay.

06:56-07:01- I am convinced about your message, I will take him to the health center and will take some ORS solution for him.

07:10-07:12- Let me follow you and go home.

07:17-07:20 - How can you treat diarrhea at home?

07:24-07:30 -

- For babies under 6 months, breastfeed more frequently.

07:31-07:37 -

- For babies > 6 months and children, prepare 1 packet of ORS a day and give it until the diarrhea has passed.

07:38-07:43 -

- **Take your baby/child to the health center when he/she has more than 3 loose stools a day.**

08:25-08:33 - Let me put one Aqua Tab in the water to purify it. I will then pour it into the mud pot after 5 minutes.

08:33-08:36 – AFTER 5 MINUTES

08:38-08:43 - Let me pour the water into the mud pot. Five minutes are now over.

09:32-09:35 - Peace be with you! Peace be with you too!

09:36-09:40 - Good morning. Good morning. How are you? We are fine.

09:41-09:45 – Barira, I come to see you. Alright! Have a seat there. 09:48-09:55 – Barira, continue keeping hygiene a priority. I can see your baby is in good health.

10:00-10:03 - If you continue exclusive breastfeeding until 6 months of life, she will look healthy like this child (shows).

10:04-10:10 - Don't allow anyone to give her water until she reaches 6 months of life.

10:12-10:16 - What if she suffers diarrhea? Can I give her an ORS solution?

10:17-10:22 - No, you can't give her an ORS solution unless prescribed by a health worker.

10:25-10:30 - You can't give her ORS solution without a prescription.

10:31-10:33 - Okay. Thank you.

10:33-10:39 - To protect children from diarrhea and malnutrition, what is the most important thing to do?

10:43-10:52 - Avoid contact with animal and human feces which contain dangerous germs that make you sick.

10:56-11:09 - Normally we talk in group, but today I come to the home to sensitize Barira on hygiene and exclusive breastfeeding.

11:10-11:12 - With your permission, Sir.

11:13-11:25 - Thank you! Women are not alone, even we, men, have understood that to have a healthy strong child...

11:26-11:29- ...attention must be given to hygiene and exclusive breastfeeding until 6 months.

11:27-11:37- We will continue supporting you in this regard.

11:39-11:44 - THANKS
